

Questions about our Society Today

Approximately a week or so ago a terrible event took place in Minneapolis at a Catholic Church. It was a shooting through the windows of a church full of young school children by a troubled assailant (transgender) killing 2, critically wounding a dozen or more. Do we accept this as normal?

Why did this happen and how can we prevent this in the future?

Could it be that “we the people” conditioned individuals to disregard the value and sanctity of a humans’ right to existence?

Have we unwittingly caused the attitude that Human Life has NO value?

Another question: How many abortions occurred that day in Minneapolis? Records show, in 2023, 14,124 abortions were reported in the State, up 16% from the previous year.

Minnesotans have voted NO gestational limits, NO waiting period, or parental involvement required. This comes to approximately “54” abortions daily. Has our society become so conditioned and apathetic in protection Human Life in its’ basic Rights?

To answer the previous question of how to prevent events like this in the future?

Would it not be acceptable to revisit the core question about Human Right To Life for all. Especially the most vulnerable? Time to stop pointing the finger at others with false solutions.

What does it mean to be HUMAN?
